Abstract

A new clinical study conducted in Turkey on a number of COVID-19 patients showed excellent fast results with no side effects reported. The new results confirmed previous clinical results obtained in seven other countries the thing which gives a new hope to solve COVID-19 pandemic worldwide.

Keywords: COVID-19 pandemic worldwide.

1 | INTRODUCTION

COVID-19, is an ongoing pandemic [1] caused by a novel corona virus SARS-CoV-2 [2], has hit hard and vigorously the entire world in East and West. The disease was first identified in Wuhan City of China in December 2019 and reported as pneumonia of unknown etiology [3]. The health authorities in China confirmed the identification of a new virus 2019-nCoV belonging to the corona virus [4] family which also includes viruses that caused SARS and MERS outbreak in 2003 and 2012 respectively [5].

2 | WHEN COVID-19 PANDEMIC IS EXPECTED TO END

Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases(6), said If 75 percent to 80 percent of Americans are vaccinated in broad-based campaigns likely to start in the second quarter

of next year, then the U.S. should reach the herd immunity threshold months later. If vaccination levels are significantly lower, 40 percent to 50 percent, Fauci said, it could take a very long time to reach that level of protection.

Another unanswered question is whether the vaccines, whose trials have shown that they prevent people from getting seriously ill and dying of COVID-19, also prevent people from becoming infected in the first place and, importantly, from passing the virus on to others. It could be the case, Fauci said, that even if the vaccines don't prevent infection, they keep virus levels so low that they do prevent transmission. Those outstanding questions, however,

Supplementary information The online version of this article (<https://doi.org/10.15520/arjmcs.v7i05.313>) contains supplementary material, which is available to authorized users.

are why masking, distancing, and other public health measures will be needed even by people who have been vaccinated until we know the answers. We're going to find out from follow-up studies," Fauci said. "We should not say that vaccines are a substitution for public health measures; [they're] a complement to public health measures. Experts detail vaccine unknowns, need to continue masking and distancing. Dr Fauci is optimistic pandemic may end in the end of 2021 or early 2022.

Many factors will determine the overall outcome of the pandemic:

1. Though a number of vaccines were made to help on preventive basis in decreasing the number of infections or consequences of virus effects on health till now moment pharmaceutical companies did not arrive at an efficient drug for millions of patients who were already infected could not arrive at an efficient drug to cure or treat the huge number of infected cases worldwide.
2. Lack of money in many poor countries to buy drugs or vaccines.
3. Suspicious aspects raised by a number of scientists and medical doctors worldwide about the mRNA-based vaccines safety and efficacy since were studied for a short period of time and they did not build a long term reliable data.
4. Commercial conflicts and competition among vaccines and drugs companies.
5. Confusion among all countries about successful means to control virus spreading
6. Closing economies and locking down millions of healthy people created economic crisis and social problems; for example 32 million people lost their jobs in United States.
7. There are still a number of questions to be answered by experts about vaccines since they are new and they hope to arrive at answers for all issues.

Since there is no effective drug to treat infected people is available Professor Mansour developed an efficient natural fast formulation to help millions of infected cases .

3 | IMUTECH PROTOCOL

IMUTECH protocol consists of two parts

3.1 | IMUTECH Herbal Capsules2

Including immunity enhancer and anti-viral extracts ;such as Graviola Leaf Powder, Raspberry Fruit Powder, Green Tea Leaf, Curcumin, Beta-glucans, Garlic Bulb Powder, Panax ginseng Root, Mushroom Powder, and Olive leaf. This mix is effective in treating and preventing COVID-19 .

3.2 | IMUTECH Natural Oil Mix

Including ozonated mix of Eucalyptus, Peppermint, Tea Tree, Lemon, Pine Needle, Cardamom and Laurel Leaf essential oils. These oils do possess antiviral power, immunity enhancing excellent effect besides they ease the breathing process which is highly needed by COVID-19 patients. This oil is used in cup of the nebulizer for enhancing immunity , eliminating viruses and widening lung bronchial passages. Ultrasonic transmission activates or excites the oil vapor to increase its effectiveness in widening lungs bronchial passage's therapy.

4 | CLINICAL PROCEDURE

One capsule was used per meal five times daily for 2 days together with 2 ml oil mix and 5 ml distilled water in the cup of nebulizer for 25 minutes 5 times daily for 2 days with the mouth piece inside patient's mouth.

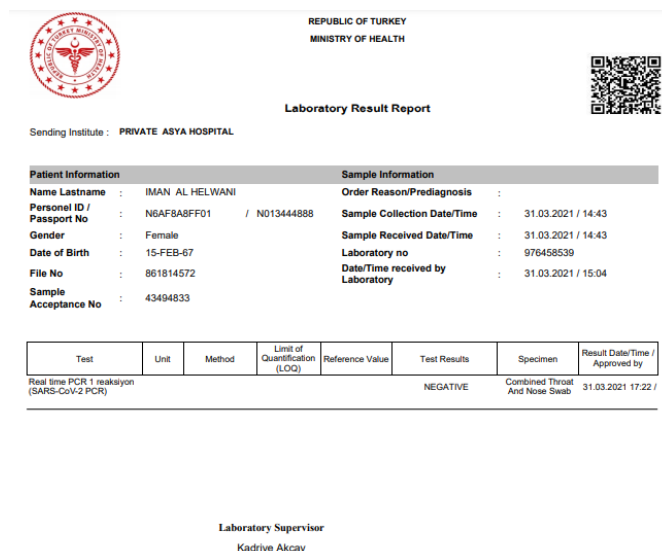

A NEW TURKISH CLINICAL TRIAL TO TREAT COVID-19 USING A NATURAL NANO FORMULATION

5 | NEW COVID-19 CLINICAL RESULTS IN TURKEY

Previously a multi-national clinical study was conducted(7) on more than 600 COVID-19 cases in Dubai, Abu Dhabi, Jordan, Turkey, Russia, Moldova, USA, Palestine Syria and Kuwait between May 2020 and May 2021 with 100% success rate including ICU cases.

The effect on COVID-19 patients was dose dependent, and session-period dependent. Nano herbal mix capsules were taken 3 times daily to treat coronavirus for three day-course. In the new Turkish clinical study inhalation 25 minute sessions by nebulizer using ozonated oil was made 5 times daily for 3 days and recently for 48 hours only.

One of the cases treated is a female medical doctor who was infected by COVID-19 and her health condition was severe was treated in Istanbul for 48 hours and was 100% cured in 48 hours is attached at the end of this article.

6 | CONCLUSION

This patent-pending botanical nano formulation is different from any other drugs available worldwide for the treatment of COVID-19 for the following

Reasons:

1. It is 100% natural
2. It is 100% safe
3. It is very fast since treatment duration is 48 hours only though severe cases may take few more days.
4. It is 100% cure and not it only reduces symptoms of infected patients
5. It is very cheap
6. It can be used for disease prevention besides it is used as a cure since it doubles immunity in a short time.

IMUTECH represents the first natural safe fast cure in the world and it is registered as a food supplement by the FDA in USA and Turkey and it is expected to help hundred millions of COVID-19 Virus cases worldwide. Double blind is still needed to give more reliable results.

Conflict of Interest

There is no conflict of interest.
